## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nanjo et al (US 5166164; 11/24/92). Nanjo teaches a method for controlling Diptera (flies) with chlothianidine. See abstract, column 1 lines 7-51, column 5 lines 30-51. Nanjo teaches that the insecticide, chlothianidine, is applied to kill insects in the environment of warm-blooded animals. See column 1 line 43 – column 2 line 4. Nanjo teaches that this application exhibits low toxicity to the warm-blooded animal. See column 8 lines 53-58. Nanjo does not explicitly teach the application to a livestock pen. However, it is obvious that the environment of the warm-blooded animal taught by Nanjo is the livestock pen of the warm-blooded animal.
